

# Comprehensive Email Lifecycle Management Suite for GroupWise® 8

Upgrade Now to GroupWise® 8 and Get the M+Platform

## Simplicity vs Complexity - the Choice is Clear!

Already upgrading to GroupWise 8? Topgrade the rest of your messaging infrastructure with the M+ Platform. M+ is the most comprehensive email lifecycle management suite for GroupWise 8. Security, compliance, data-leak prevention, archiving and discovery, all provisioned and managed in a single product suite, from one of the most trusted Novell partners. Reducing costs, improving performance, eliminating risk - it's all part of Making IT Work As One.

## Thousands of Organizations Already Use M+

As businesses look for innovative solutions not to compromise security and compliance in tough economic times, Messaging Architects and Novell teamed up to offer a complete identity-driven, compliant messaging infrastructure at an unbeatable price. Simply put, with GroupWise 8 and the M+Platform you get the most reliable, secure, and compliant collaboration platform on the market.

**“By deploying Messaging Architects’ email security and compliance solutions, customers are able to future-proof their investment in GroupWise.**

**Messaging Architects’ products also strengthen our confidence in the success of GroupWise 8.”**

Kent Erickson, Senior Vice President,  
General Manager Workgroup Solutions, Novell

Scaling seamlessly across your GroupWise 8 system, the M+Platform bridges security gaps, automates retention, ensures legal and internal compliance, and tracks the entire lifecycle of an email message from the moment it is received in the collaboration system to its destruction through centralized role-based policies.

## Topgrade to the M+Platform:

The M+ Email Lifecycle Management Suite for GroupWise 8 includes: **M+Guardian, M+Archive, M+SecureStore, M+Extranet, GWTreecast.**

## For more information visit:

Call: 866-GWS-0101 (866-497-0101) Ext. 888

## Identity-Driven Security & DLP

Integrating anti-spam, anti-malware, content filtering and data-leak prevention, M+Guardian stops email threats from impacting your organization and compromising security.

For 5 years, M+Guardian has been the solution that protects the GroupWise system at Novell. To learn more:

## Policy-Based Archiving & Discovery

As the leading email archiving solution for GroupWise 8, M+Archive enables organizations to address the challenges of email retention, regulatory compliance, and electronic discovery. M+Archive is the only archiving solution on the market to take advantage of the stubbing feature of GroupWise 8 for seamless access to the centralized archives directly from the GroupWise client.

## Infinitely Scalable Storage

A high-performance and high-availability product, M+SecureStore manages the lifecycle of your email messages and attachments while dramatically reducing the cost, complexity, and time traditionally required for provisioning storage. As an added benefit, M+SecureStore provides a greener IT storage environment resulting in a substantially smaller footprint not only in capital expenditures and management labor, but also in energy consumption, cooling, data center space, and associated costs. ## Enhanced Productivity

As part of the M+ Email Lifecycle Management Suite you'll also receive licenses for M+Extranet and GWTreecast. M+Extranet is a simple web-publishing application that empowers GroupWise 8 users to share information with anyone who has access to a web browser. GWTreecast leverages the GroupWise Shared Folders capability to ensure that end users have access to the information stored in GroupWise whenever and wherever they need it.

## About Messaging Architects
